Hi,
I finally got to read the story and it is quite a saga. Maybe I'm missing something but except for their inconsistencies and some possible arbitrary behaviour, I don't see a "smoking gun". A lawsuit could have a positive end but they have lots of money to fight with and it would cost someone a bundle to proceed. Unless government looks into it, where does this go from here? Is there any chance of getting their self-appointed position as "the" authorities negated by establishing another authenticating group?

Hey Len...

It is 6:45 a.m. and I have been up all night working, but did not want to wait another minute to tell you to rush out and pick up a copy of the November issue of Vanity Fair. You will not believe your eyes when you see what's inside...

It has taken seven years to get this story out - finally - and let justice be done! You won't see my name anywhere (deliberately so), but you can be sure that I had a hand in it.

More when we talk soon. Hugs to you both...

Nicky
